

01 / A FRESH START

Small Brott. Big day.

Watch Pip fight. Choose its gear.
Take the wheel when it matters.

Five encounters in the Sunroom Scrapyard. One little machine with unreasonably big plans.

Meet Pip and play

Actual gameplay. Original robot drawings, no borrowed character art.

The battle is the point.

Keep the spark.

Watching different machines fight.
Seeing a new build behave differently.
Getting another chance after a close loss.

Lose the clutter.

No programming editor, leagues or shop economy. Start with one Brott. Make a clear equipment choice after each victory.

Check the actual game.

A passing simulation test cannot tell us whether the controls feel responsive or the battle is readable. Inspect the real browser journey too.

03 / BUILD A LITTLE DIFFERENT

Close Coil. Long Barrel.

A heavy close-range hit, or a precise bolt from farther away.

Choose one direction. Then complement it with faster firing, more hull, better steering or a little self-repair. Eight upgrades, four choices per run.

Choosing an upgrade restores Pip's hull before the next encounter.

Actual reward screen. These choices change the equipped weapon and combat rules.

04 / WATCH. THEN MAKE YOUR MOVE.

Pip fights. You pick the moment.

Move without going quiet.

Click ground to set a destination. Pip keeps firing while it travels. A new target does not cancel your route.

Read the Chief.

The boss locks its aim line before a three-bolt burst. Move sideways after the warning to leave that line.

Stay in control.

WASD or arrows steer. Q cycles targets. Pause takes a breather. Return to auto lets Pip take over again.

[Watch the captioned gameplay demo.](#) One real run shows a gear choice, movement and target commands, and the final outcome. Time cuts are labeled.

05 / BUILT SMALL. CHECKED IN PLAY.

A complete little circuit.

Four regular encounters, one boss, two repairs and a new build to try next time.

Standalone by design.

No account, runtime AI, cloud service or analytics. Original geometric art and optional synthesized mechanical sounds.

Honest limits.

Testing and independent critical review are agent-only, not human playtesting. A compact five-encounter game, not an endless campaign.
